Executive Summary

The food & beverage industry is one of the promising sectors in the GCC region and has shown a strong appetite for growth for a longer period. The Covid-19 pandemic has led to a severe downfall in the industry growth and reduced the demand for people's spending. The industry is one among the most affected by Covid-19 due to lockdowns, travel restrictions and social distancing. The dine-in spending in the region also stands affected. The F&B industry in GCC is different from other regions where high number of expatriates and young generation define the growth path for the industry. The emerging online culture of the young, tech-savvy population has pushed the foodservice operators to evolve and adapt. It has become necessary for businesses to meet the diversified demands of the people. UAE and the Kingdom of Saudi Arabia are the key regions that contribute to the industry growth and has become pioneers in industry transformation. The region has many global and local players meeting the rich and varied demands of the consumer market. Chief among the reasons for changing eating patterns in the region is the emergence of Quick Service Restaurants (QSR) chains such as KFC, Burger King, Pizza Hut and regional outlets like Herfy, ChicKing that provides high quality foods at an affordable price in faster service. The ongoing pandemic has changed the behavioural pattern of eating out and the food restaurants are adjusting their business to cloud kitchen and online delivery to meet the new trends.

The industry has changed its face since the Covid-19 pandemic. Online food ordering and delivery platforms have changed the way people consume food. The innovation of technology has given power to the consumers to get their favourite foods in a few minute's time. Travel restriction and social distancing further fuelled the growth of online ordering platforms. Players like Talabat, Zomato, FoodonClick have helped businesses to transform operationally to meet the evolving trends. Talabat has clocked over 4 million monthly visits in April 2021 and average daily orders on an average exceeds 100,000. New business models like cloud kitchen and Kitchen-as-a-Service model have encouraged all restaurants to meet the increased demand. Overall, the future outlook for the Food & Beverage industry is expected to be stable. While increasing awareness of health and convenience of online food ordering could drive market growth.

Executive Summary

The industry has a wide variety of players from local and overseas. The major QSR share is held by food chains like Herfy, McDonalds, KFC, Burger King, Pizza Hut and Subway. These six franchises alone have over 2,700 food outlets in the GCC region. Americana group operates the majority of the franchise chains in the region such as KFC, Hardee's Krispy Kreme.

The GCC region imports majority of the meat from outside the region and they mostly import meat from Asian and South American countries. The industry has a certifying body for checking the quality of the meat. International Halal Accreditation Forum launched in 2016 with 10 founding members has over 35 countries as members now. This body encourages and facilitates the adoption and implementation of natural standards for food quality.

High supply of retail places has impacted the rental prices. The rental rates have reached the upper level and were falling for the past few years. The top cities like Dubai, Abu Dhabi, Riyadh and Jeddah are expected to add 1.08 million square meters of retail space in 2021 in addition to the existing space of 11.6 million square meters. Property owners are offering deep discounts and offers for attracting and retaining the tenants. The rental rates have fallen approximately 8% in those four cities in 2020.

In addition to rental rates, the foodservice operators are face challenges in the implementation of Value Added Tax (VAT) for the products. The implementation of tax is triggered by low oil prices and as a measure to diversify the country's income sources. The introduction of VAT may likely impact the consumer's purchase but it is unlikely to stay hindrance for the long term.

GCC region also benefits from higher living standards that will encourage high consumer spending. Consumers are also becoming highly selective in their product preferences, comparing quality and price differentials in a holistic manner, presenting opportunity for retailers. At the same time, investors and operators are increasingly looking to gain market share by establishing new outlets.

Did you know?

- The total food service outlets in the GCC nations is estimated to be more than 134,000 in 2020.
- The overall market expenditure of Saudi Arabia on food and beverage is estimated to be more than USD 50 billion in the year 2020.
- KSA is a leading market for QSR chains such as McDonalds, KFC and Pizza Hut and they have 304 stores, 220 stores and 222 stores. respectively.
- Total restaurant sales of UAE are expected to reach USD 8.9 billion by 2025
- Kuwait market is the third largest among the GCC nations and the Food & Beverage sector accounts for 1.6% of the non-oil GDP
- The Food & Beverage in Oman market is expected to reach the pre-pandemic level of business in the year 2022.

About Marmore

Marmore MENA Intelligence is a fully-owned research subsidiary of Kuwait Financial Center 'Markaz'. Since 2006, Markaz Research has been at the forefront in disseminating thought-provoking, hard-data backed research reports. Marmore continues that legacy with a focused approach to providing actionable solutions for business leaders and policymakers.

Since its inception, Marmore has published over 700 research reports and covered more than 25 varied industries and infrastructure segments; all focused primarily on the GCC economies. (To view our Research Library, please [click here](#))

With over 30 policy and regulatory research studies published, Marmore has partnered with renowned regional think-tanks and opinion-leaders to publish some of these intellectually provoking policy research papers. These research studies aim to initiate dialogue and propose better solutions to existing economic conundrums. (To view our Policy & Regulatory research report, [click here](#))

Marmore provides research-based consulting solutions to help understand current market conditions, identify growth opportunities, assess supply/demand dynamics, and make informed business decisions.

Almost on a weekly basis, Marmore publishes thematic economic, industry, policy and capital market reports. Marmore has been recently conferred "Research Provider of the Year - 2018" award by Global Investor, a Euromoney Group company. To learn more, visit www.marmoremna.com

Unique challenges companies face in GCC

Challenges faced by foreign consultants

- ✓ Understand the Cultural fit
- ✓ In-depth regional awareness and capacity to provide real time solutions
- ✓ Ability to validate and overcome the information gap
- ✓ Ability to deal with data paucity

Challenges faced by local companies

- ✓ Ability to analyze the big picture and find opportunities
- ✓ Ability to connect findings with global developments

Consulting - We only win when our clients win

We at Marmore thrive on overcoming all the challenges and create value for our clients

Our breadth of coverage and deep dive research capabilities enables us to be preferred partners

Our experienced team is adept in data validation

We conduct channel checks to authenticate information

Having our Parent in Kuwait, we are well verse with cultural aspects of the region and attune our findings in accordance

We have the ability to come up with a solution which actually works for the region

Why partner with us?

Dealing with GCC region requires immense experience to understand the nuances and deliver:

Marmore's experienced and qualified Team is an asset to have

What differentiates us with others is the ability to provide solutions on a spectrum of topics like Industries, Economies, Policy and Technology - *We take pride in our breadth of research*

In a region with lack of appropriate data, ability to collaborate with relevant stakeholders is a key strength – *Our presence in Kuwait and connection with relevant stakeholders across GCC region gives us advantage over competition*

We believe in good actionable work and serve our clients to the best of our ability – *Our work speaks for our clients and our clients speak for us*

Consulting Experience:

Case Study 1: Study on Fintech Adoption in Kuwait (2019)

BACKGROUND

Advent of modern and disruptive technologies means that the world of finance and money is undergoing several momentous changes. This presents both opportunities and threats to the existing financial order. In this context, a quasi government institution in Kuwait engaged us to understand the state of FinTech adoption in Kuwait.

KEY CHALLENGES

Coordinating the interview schedules of over two dozen key personnel in Kuwait within a short span of time. Synthesizing the information collected into useful insights that could help in the development of FinTech related policy within the set deadline was a challenge.

MARMORE APPROACH

Marmore conducted extensive meetings and interviews ranging from government entities, corporate professionals, entrepreneurs and start-ups in Kuwait to understand the developments in FinTech space. In the Kuwait banking sector, Chief Executive Officer (CEO) and Chief Information Officer (CIO), or equivalents, were personally met and discussions were held to gain insights into their strategies and their work related to FinTech.

By factor analysis, self-constructed indices and analytical efforts the collected data was used to identify the ability of FinTech to impact Kuwait bank profits

KEY PROJECT BENEFITS / SUCCESSES

Recommendations for Government agencies, private sector (banks and other financial institutions) and the FinTech sector to help cement Kuwait as a serious FinTech player were provided. The recommendations covers a mix of long- and short-time line actions that will help shape the Kuwaiti ecosystem in terms of skills or talent, critical investments and infrastructure that will help better balance risk and innovation

The report findings were also presented by Marmore to a wide member of distinguished audience at the FinTech Forum held in Kuwait.

Consulting Experience:

Case Study 2: To conduct a valuation study (2019)

BACKGROUND

An Egypt-based asset management company approached Marmore to conduct a independent valuation study on one of the largest Egyptian consumer utility companies in the energy sector. The project required us to value the company by also ascertaining the fair valuation of all the non-listed investments of the company.

KEY CHALLENGES

The energy sector company had investments in many private companies which were reported on a historical book value basis and didn't represent the fair value of these investments. Diverse nature of these investments, cross ownerships and limited availability of data were key challenges in ascertaining their fair value.

MARMORE APPROACH

Marmore developed the valuation report by performing an in-depth financial analysis of the company while relying on the information provided by the client and publicly available data. Extensive research was carried to find out greater details for all the non-listed investment companies, and reasonable assumptions were taken to arrive at the fair value. A detailed valuation model was prepared with three scenarios. Two prominent methodologies in the form of discounted cash flow and trading comparable (using local and foreign peers) methods were used to conduct the sum of the parts valuation of the company

KEY PROJECT BENEFITS / SUCCESSES

The valuation report provided actionable insights to the client and also helped them to understand the fair value of all the non-listed investments of the company.

Marmore received very encouraging feedback from the client, as our report was also presented to the board of the company for consideration to re-classify its investments as 'available for sale' using fair value approach instead of cost approach.

Client testimonial

Marmore services were very useful and their team have provided a timely and reliable service in a challenging task. We are definitely looking for more cooperation in the future

Consulting Experience:

Case Study 3: To develop market penetration strategy (2020)

BACKGROUND

One of the leading regional bank in the GCC region aspiring to expand its market beyond its home country required to develop market penetration strategies for a specific target market. Marmore was engaged by the Bank to conduct the study and provide optimum solutions.

KEY CHALLENGES

The Bank was looking to enter the market by establishing a digital presence in the target market. As the concept is still relatively new for the GCC region, we had to rely on trends and patterns that existed in the developed markets. The problem was confounded due to paucity of data in both regional and international markets.

MARMORE APPROACH

In order to build effective strategies we created a lot of case studies to better understand the pain points in entering the market with digital only presence and also prepared competitive landscape for GCC region. We evaluated the potential target market with the help of third party surveys and segmented the market into different categories. For each of the customer category, strategies were proposed in terms of preferred product, features that they must sport and relevant marketing activities to capture that segment. Marmore also helped the bank with a detailed financial break-even model for the proposed digital presence.

KEY PROJECT BENEFITS / SUCCESSES

Marmore compiled all the findings in an effective manner and prepared a detailed report with multiple market penetration strategies for the client. The client has presented the findings to their Board to pursue the path with greater conviction.

Select Client Testimonials

We were fortunate to work with Marmore on our project recently. The team was always professional, efficient and attentive to all our requests. They were prompt in addressing any concerns raised and we felt at ease approaching the team with our needs. We were pleased with the end result and would not hesitate to highly recommend Marmore for their business intelligent services.

Dr. Fatima Al Awadhi
Founder of Kuwait-based Aesthetic Clinic

Marmore team is very professional, from day one I saw that when they replied to my first email. We had our first project and they did a great. Many changes have been done and they were very flexible with us. It will not be our last project for sure, thanks Marmore team.

Abdullah Molla
Head of Communication & Business Development, Riyadh Valley Company

Marmore has provided both timely and reliable and services in the provision of market data. This service has proven valuable in supporting the research activities of Acreditus across all our client focus areas of credit, rating and Islamic finance advisory. I sincerely hope to continue to engage them on more advanced projects soon.

Khalid F Howladar
Managing Director and Founder of Acreditus

The experience of working with Marmore has been very positive. A precise understanding of our requirements and high quality deliverables were the key takeaways. The turnaround time for the tasks was excellent, without any delays and the tasks were handled in a professional manner.

Nigel Sillitoe
CEO, Insight Discovery - UAE

We have worked with Marmore in many occasions and are impressed with their in-depth research approach, quality analysis, and best of all, timely delivery. The team at Marmore also understands the regional business dynamics and provides exact, tailored solutions.

Ahmad Khamis
CEO, Bloovo.com

Marmore services were very useful and their team have provided a timely and reliable service in a challenging task. We are definitely looking for more cooperation in the future.
